

CannaSunTM

COLLECTION 2026

By Green Works

Why growers worldwide choose CannaSun™

Tropical energy. Bred to perform.

CannaSun™ is Green Works' Canna F1 own breeding program, developed to produce the most reliable, naturally compact and high-performing Canna for professional growers and retailers worldwide.

EXCELLENT GERMINATION

Exceptional germination and uniformity for reliable, efficient production.

FLOWERS UNTIL FIRST FROST

The earliest flowering Canna, with a long flowering season from spring until the first frost.

MULTIPLE FLOWER STEMS

8–12 flower stems per season from an early stage for maximum impact.

NATURALLY COMPACT

Compact habit with strong branching for a full pot. No PGR needed.

VIRUS FREE SEED

Grown from seed under strict hygiene conditions for healthy, worry-free crops.

LASER SCARIFIED SEED

Laser scarified for faster, more uniform germination and stronger seedlings.

PROPRIETARY F1 BREEDING

Years of breeding and selection to deliver the very best in Canna performance.

The CannaSun™ Collection

Vibrant colour. Continuous flowering. Reliable performance.

CannaSun™

Our main series with bold, vibrant colours, multiple flower stems and excellent garden & patio performance.

A new generation of Canna:
Compact, colourful and made to perform.

UNIFORMITY & UNMATCHED GERMINATION

Excellent germination percentage and strong uniformity ensure consistent, high-quality plants throughout production.

FAST BRANCHING & POT FILLING

Early, natural branching creates full, well-shaped plants that quickly fill the pot.

FAST GROWING

The fastest-growing F1 Canna.
For a fast and efficient crop.

SUSTAINABLE & NATURALLY COMPACT

Naturally compact plants, reaching 30–40 cm (12–16") in height and perfect for 12–15 cm (5–6") pots, without the need for growth regulators.

MORE PLANTS PER M²

The compact habit allows higher plant density per m², helping growers use valuable greenhouse space more efficiently.

ALL SUMMER FLOWERS & UNTIL THE FIRST FROST

Continuous flowering throughout summer provides lasting colour right up until the first frost.
